

BSC AI Factory Acceleration Program Application Form

- **Application Dates: 13/04/2026 – 6/05/2026**

This application form helps us assess your startup's fit for the BSC AI Factory Acceleration Program. Please answer each question as clearly and concisely as possible, staying within the character limit indicated in each section.

Responses will be evaluated based on: *Quality and maturity of the AI solution and depth of the technology (30%); Disruptiveness, Strategic Relevance and Use Case Fit (25%); Team capacity (20%); Scalability and impact potential (20%); Relevance and Added Value of the BSC AI Factory Environment and HPC/AI usage (5%).*

1 -Describe your AI solution, including its core functionality and main technical components and explain what makes your technology unique or innovative. Try to make it clear whether AI forms part of the core of the business model. Please, include if you have any proprietary technology, datasets, or intellectual property.

2 - What is the current stage of development (concept or idea, prototype, MVP, production)?
Please provide evidence if you have some active pilots, sales or other validations.

3 - Explain what problem you are solving and for whom. Describe why it is important to solve this problem in today's world. Also, briefly explain what makes your solution unique compared to existing solutions on the market.

4 - Describe your core team (founders and key members – up to 4 people) and outline the team's relevant skills and experience (technical, business and sector-specific expertise). You may also include their LinkedIn profiles.

5 - Explain your business model and how your technology ensures it is as scalable as possible. In your answer, you should also identify the potential market your solution can reach and briefly outline its potential impact (social, environmental and economic).

6 - Please explain, in a concise manner, how your solution utilises artificial intelligence and/or high-performance computing, and why the support offered by the BSC AI Factory project is important for accelerating the development of your solution.

Additional Information (Optional but Recommended) - In this section, you can explain anything relevant that you haven't been able to cover in the previous answers (fundraising, traction, partnerships, etc.) or any other milestones.
